

# EXAMPLES OF NORMAL EVALUATION FINDINGS

## AUDITORY COMPREHENSION

Answered questions in conversation and followed directions in context without difficulty. Auditory comprehension was judged to be WFL for current needs.

## VERBAL EXPRESSION

Expressed ideas in fluent language with no overt evidence of decreased syntax, semantics, or word finding. Pragmatics were WNL.

## READING COMPREHENSION

Adequate for completion of registration paperwork; no further assessment completed given the nature of presenting complaint.

## WRITTEN EXPRESSION

Adequate for completion of registration paperwork; no further assessment completed given nature of presenting complaint.

## MOTOR SPEECH

Greater than 90% intelligibility in connected speech with no evidence of motor speech impairment.

## ORAL MECHANISM

All structures and functions were WNL.

## SWALLOWING

Tolerating a regular diet with thin liquid; no evidence of dysphagia.

## COGNITIVE COMMUNICATION

Alert and fully oriented. Sustained attention to diagnostic tasks without redirection. LTM intact for biographical information; STM adequate for recall of same-day events and data span. Functional problem-solving appeared adequate for current daily needs.
